Eyecare professionals who need to familiarize themselves with Topcon Medical Systems diagnostic equipment can rely on the Topcon Online University training system. The site debut featured the CV-5000S Automated Vision Tester, KR-1W Wavefront Analyzer and CL-300 Computerized Lensmeter, and instruments are added as training materials become available.

The Topcon Online University Training Program is designed for technicians, optometrists, ophthalmologists and other eyecare professionals who are getting started with Topcon instrumentation. Through a combination of narrated videos, graphics and step-by-step instructions, the system highlights the key features and operating procedures of each instrument.

Also: Now available from Topcon is the new, fully automatic TRC-NW400 Non-Mydriatic Retinal Camera. Using the TRC-NW400, operators do not need to spend time aligning, centering, focusing or capturing color retinal images because the unit automatically performs these steps once the camera is positioned in front of the eye.
