Transitions Optical has released the 2017 *Transitions*® Lenses Product Availability Guide which outlines the wide availability of Transitions Optical’s photochromic technology by design, material and lens caster partner. The guide is also designed to help eyecare professionals decide which *Transitions*® lenses best suits their patients’ needs in a clear and concise chart.

The Product Availability Guide includes information on the *Transitions* family of brands, including *Transitions*® *Signature*® VII lenses, *Transitions*® *XTRActive*® lenses, *Transitions*® *Vantage*® lenses and *Transitions*® *Drivewear*® lenses. The guide features information on usage, color options, behind-the-windshield activation, polarization, protection and more. It also gives an overview of *Transitions*® Adaptive Sunwear products, including sport sunglasses for running and cycling, *Transitions*® adaptive goggles for skiing and *Transitions*® adaptive shields for motorcycle riding.

The *Transitions* Lenses 2017 Product Availability Guide can be downloaded online by visiting [TransitionsPRO.com](http://TransitionsPRO.com) and clicking on the callout on the homepage. The guide can be printed and shared with eyecare professionals and store associates.
